

General Zachary Taylor Mexican War

Introduction: The Rise of “Old Rough and Ready”

The name Zachary Taylor might evoke images of a rugged frontier soldier, a man who wore a straw hat and homespun coat even while commanding armies. Yet, few figures in American history are as intrinsically linked to a single conflict as General Zachary Taylor is to the Mexican-American War. Before he became the 12th President of the United States, Taylor was a national hero, forged in the crucible of the Mexican War. His campaigns in northern Mexico not only captured the popular imagination but also redrew the map of North America. To understand the man, the conflict, and the expansion of the United States, one must dive deep into the story of General Zachary Taylor and the Mexican War.

The Mexican-American War (1846-1848) was a defining, and often controversial, chapter in U.S. history. It was a conflict driven by Manifest Destiny, a belief that the United States was destined to stretch from the Atlantic to the Pacific. General Zachary Taylor, known affectionately by his men as “Old Rough and Ready,” was the instrument of that destiny on the battlefield. His gritty, unpolished leadership style and his stunning victories against a larger, more experienced Mexican army made him a household name and catapulted him to the White House.

This article explores the leadership, key battles, and lasting legacy of General Zachary Taylor during the Mexican War. We will examine his military strategies, his relationships with President James K. Polk and fellow General Winfield Scott, and how his battlefield success defined a crucial period in American history. We will also look at the unique command structure of the era and how Taylor's military career became a stepping stone to political power.

Before the War: The Making of a Frontier Soldier

To appreciate General Zachary Taylor's performance in the Mexican War, one must first understand his background. Born in 1784 to a prominent Virginia family, Taylor grew up on the Kentucky frontier. He received a modest formal education but developed a deep understanding of the land, people, and the practical realities of survival. He joined the U.S. Army in 1808 as a first lieutenant and spent the next three decades serving in various frontier posts, fighting in the War of 1812, the Black Hawk War, and the Second Seminole War.

This long career on the American frontier shaped Taylor’s military philosophy. He was not a tactical genius in the traditional sense, nor was he a formal student of military theory. Instead, he was a pragmatist. He believed in training his men hard, maintaining strict discipline, and trusting his instincts. He was known for his dislike of pomp, ceremony, and elaborate uniforms—hence the nickname “Old Rough and Ready.” He often wore a simple straw hat and a linen duster coat, looking more like a farmer than a commanding general. This informality endeared him to his soldiers, who saw him as one of them. He was a soldier's general, and his men would follow him into hell itself.

By 1845, as tensions between the United States and Mexico reached a boiling point over the annexation of Texas, Taylor was a seasoned colonel. He was the logical choice to lead the American forces into the disputed territory between the Nueces River and the Rio Grande. This mission would set the stage for the war.

The Outbreak of War: Taylor’s Army of Occupation

In the summer of 1845, President James K. Polk ordered General Zachary Taylor to take a “Corps of Observation” into Texas. The mission was to defend the newly annexed state against a potential Mexican invasion. Taylor established his base at Corpus Christi, at the mouth of the Nueces River. The Mexicans, however, claimed the Nueces as the southern border of Texas, not the Rio Grande. This territorial dispute was the spark that lit the fuse.

For months, Taylor’s army sat in camp, drilling and preparing. It was a motley force of regulars and volunteers, largely untested in large-scale combat. By March 1846, under direct orders from Polk, Taylor advanced south to the Rio Grande, building a fort (later named Fort Brown) directly across from the Mexican city of Matamoros. This was a deliberate provocation, and it worked. The Mexican government viewed this as an invasion of their sovereign territory.

On April 25, 1846, a Mexican cavalry unit crossed the Rio Grande and ambushed a small American patrol, killing or capturing 16 men. This was the “American blood upon American soil” that President Polk used to justify his request for a declaration of war. For General Zachary Taylor, the Mexican War had begun.

The Battle of Palo Alto (May 8, 1846)

General Zachary Taylor’s first major engagement of the Mexican War was the Battle of Palo Alto. Learning that the Mexican army under General Mariano Arista had crossed the Rio Grande and was besieging Fort Brown, Taylor marched his army of roughly 2,300 men to relieve the garrison. He met Arista’s larger force of approximately 3,400 men on the prairie of Palo Alto, about five miles from present-day Brownsville, Texas.

The battle was a revelation in modern warfare. Taylor deployed his army in a line, utilizing his “flying artillery”—light, mobile cannons commanded by officers like Major Samuel Ringgold. These guns were far superior to the Mexican artillery. They fired exploding shells with incredible accuracy, tearing holes in the dense Mexican ranks. The Mexican army, trained in Napoleonic tactics, attempted to close the distance and engage in hand-to-hand combat, but the American artillery decimated their formations before they could get close.

Taylor’s tactical decision to use his artillery as a mobile, offensive weapon was brilliant. He kept his infantry in hollow squares to protect them from cavalry charges, but the battle was won by the big guns. The prairie grass caught fire, filling the field with thick, black smoke, creating a surreal and terrifying battlefield. After a day of fierce fighting, Arista’s army was forced to retreat. The Battle of Palo Alto was a decisive American victory and the first major test of General Zachary Taylor’s command. It proved that the American army, despite being smaller and less experienced, could defeat a larger, more traditional force through superior technology and leadership.

The Battle of Resaca de la Palma (May 9, 1846)

Victory at Palo Alto did not end the campaign. General Zachary Taylor pursued the retreating Mexican army to a treacherous, dry riverbed known as Resaca de la Palma. Arista had re-established his defensive line, using the thick chaparral and the natural trench of the resaca as a fortified position. The terrain was difficult—dense brush limited visibility and made coordinated maneuvers nearly impossible.

Taylor’s command decisions on May 9, 1846, showed his aggressive nature. He ordered a direct assault on the Mexican lines. The fighting was brutal and chaotic. American infantry, including the 5th and 8th Infantry Regiments, pushed through the thickets, exchanging volleys with Mexican soldiers at close range. It was a soldier’s fight, with small unit leadership making the difference.

The turning point came when Captain Charles May led a charge of the 2nd Dragoons, shouting, “Remember your Regiment!” They broke through the Mexican center and, in a famous moment of the Mexican War, Captain May captured General Arista’s personal baggage and his maps. The Mexican command structure collapsed. Arista’s army disintegrated into a panicked rout, fleeing back across the Rio Grande into Mexico. General Zachary Taylor’s twin victories at Palo Alto and Resaca de la Palma were complete. He had cleared the border of enemy forces and secured the American position in Texas. These battles made Taylor a national hero almost overnight.

The Northern Mexico Campaign: Monterrey

With the war now officially declared, President Polk’s strategy was multi-pronged. General Zachary Taylor was given the primary mission of invading northern Mexico and capturing the key commercial city of Monterrey. Taylor’s army was reinforced with volunteers, swelling his force to around 6,000 men. He marched south from the Rio Grande into the rugged, arid mountains of northern Mexico.

The **Battle of Monterrey** (September 21-24, 1846) was a much tougher fight than the earlier battles. The city was heavily fortified, with a massive citadel and strong defensive positions in the surrounding hills. The Mexican commander, General Pedro de Ampudia, had a force roughly equal to Taylor’s. Taylor faced a difficult decision: a direct frontal assault would be suicidal.

Demonstrating his tactical flexibility, General Zachary Taylor devised a two-pronged attack. He sent a division under General William J. Worth to attack the western approaches to the city, while he himself led the main force against the eastern defenses. Worth’s men stormed the hills of Independencia and Federacion, known as the “Saltillo Road,” capturing key artillery positions. Taylor’s men fought through the streets of the city, engaging in brutal house-to-house fighting.

The battle was a grinding, bloody affair. American soldiers, many of them volunteers seeing their first real combat, suffered heavy losses from snipers and street fighting. “Old Rough and Ready” himself was in the thick of it, exposed to enemy fire, inspiring his men. After three days of intense fighting, Ampudia requested a truce. Taylor, surprisingly, agreed to an armistice, allowing the Mexican army to evacuate the city in exchange for a two-month ceasefire.

This decision was highly controversial. President Polk and General Winfield Scott were furious. They wanted the Mexican army destroyed, not allowed to escape. The armistice at Monterrey revealed a political naivety in General Zachary Taylor. He saw it as a humane, soldierly agreement, but Polk saw it as a failure of strategy. It would be the first major crack in the relationship between the president and his victorious general.

The Political Fallout: Taylor vs. Polk

The Monterrey truce was a turning point in the relationship between Zachary Taylor and President James K. Polk. Polk, a Democrat, had already been suspicious of Taylor, who was a Whig. The president was also desperate to prevent Taylor from becoming a war hero with political ambitions. Polk’s solution was to strip Taylor of his best troops.

Polk ordered most of Taylor’s veteran regulars to be transferred to a new army being assembled by General Winfield Scott for a campaign against Mexico City. Taylor was left in northern Mexico with a volunteer force of only about 5,000 men, mostly untested, short-term enlistees. Polk assumed that Taylor would be unable to take offensive action with such a small, green force. He even ordered Taylor to remain on the defensive. This was a deliberate attempt to sideline the popular general.

The decision infuriated Taylor. He felt betrayed by his commander-in-chief. He wrote bitterly to a friend, “I am to be superseded in my command by Gen. Scott, and they are taking from me the greater part of my effective force. I am left to hold the country with a force entirely inadequate.” This personal and political conflict would shape the final phase of General Zachary Taylor’s Mexican War campaign.

The Battle of Buena Vista: Taylor’s Greatest Triumph

Defying the president’s orders to stay put, General Zachary Taylor advanced his small army south to Saltillo. He was scouting the terrain for a potential advance on the interior city of San Luis Potosí. Meanwhile, the Mexican commander, General Antonio López de Santa Anna, had returned from exile and assembled a massive army of nearly 20,000 men. He marched north with the specific goal of crushing “Old Rough and Ready” in a single, decisive battle.

Learning of Santa Anna’s approach, Taylor made a fateful decision. He marched his tiny army—just 4,500 men—to a narrow, mountainous pass called La Angostura (The Narrows), near the Hacienda of Buena Vista. He chose his ground perfectly. The pass was flanked by steep, rugged mountains, preventing Santa Anna from using his superior numbers to outflank him. Taylor deployed his outnumbered force in a strong defensive line across the valley floor.

The **Battle of Buena Vista** on February 22-23, 1847, was the most famous and desperate battle of General Zachary Taylor’s Mexican War career. On the first day, Santa Anna sent a flag of truce, demanding surrender. Taylor is said to have replied, “Tell him to go to hell!” The battle began in earnest on the second day.

Santa Anna hurled wave after wave of Mexican infantry against the American line. The volunteers, many of whom had never been in battle before, fought with incredible tenacity. The fighting was ferocious. At one point, a Mexican division broke through the American line on the left, threatening to roll up the entire army and capture Taylor’s supply base. It was a moment of crisis.

Taylor, showing his trademark personal courage, rode to the critical point of the battle. He was exposed to enemy fire, his hat was shot from his head, and his horse was killed
